Too Much Moisture In Your Home

When the air in your home is too moist, you know how unpleasant it can be.

Health concerns

Too much moisture encourages mold and mildew growth; leading to unhealthy air. Excess humidity in your home also exacerbates allergy and asthma triggers.

Bedding and clothing

Too much moisture in your home makes bedding and clothing feel damp, sticky, and uncomfortable.

Higher electric bills

Relying on your air conditioner to reduce humidity results in a home that's too cold and still too humid to be comfortable. In addition, the cost of running an air conditioner is much higher than a dehumidifier. Adding a dehumidifier reduces both your humidity and your electric bill.

Damage to your home and assets

Too much moisture can create condensation on windows, walls, and other surfaces; damaging expensive woodwork, drywall, or metals.

Odor problems

Air that's too moist means musty odors in the home that can be unpleasant. Controlling humidity levels means your home smells fresh.

Pest populations

Reducing humidity also reduces the many pest populations attracted to moisture.

- Reducing moisture reduces the occurrence of mold and mildew. Drier air can help to minimize conditions to which insects and dust mites are drawn and alleviate causes of allergy and asthma symptoms.

GeneralAire® Has Your Solution

Maintain the right humidity throughout your entire home with the new **GeneralAire® GF-DH75 & GF-DH100 Wi-Fi** to protect your home and its contents, while also offering you and your family greater health and comfort.

The Benefits

- Minimal maintenance
- Treats the entire home
- Offers maximum humidity output

GeneralAire[®] GF-DH75 & GF-DH100 Wi-Fi Dehumidifiers

Features:

- Wi-Fi & Touch Screen Control
- Integrated Carrying Handles
- Adjustable Feet
- MERV 11 Filter
- Fan-Only Function
- Low-Temperature Shutoff
- 5-Year Warranty

The Comprehensive Approach to Indoor Air Quality

Creating a healthy indoor air environment requires a comprehensive approach; one that eliminates harmful pollutants and sources of discomfort in your home. Humidity control, air purification, and particulate removal are equally important components of that plan.

Installing MAC Air Cleaner with a MERV 11 filter will remove airborne dust, dust mites, pollen, pet dander, and other airborne pollutants as small as 0.1 microns (a human hair is 75 microns). Reduce allergy and asthma triggers with a MAC air cleaner.

Contact your local contractor to learn more about how to create a healthier and more comfortable home for you and your family. And visit us at www.generalaireiaq.ca for more on indoor air quality.

GF-DH75 & GF-DH100

Capacity	Up To 75 Pints Per 24 Hours @ 80°F / 27°C - 60% RH	Up To 100 Pints Per 24 Hours @ 80°F / 27°C - 60% RH
Weight (Pounds)	58	65
Dimensions (Inches)	12.75 H x 12.6 W x 21 D	15.75 H x 12.6 W x 21 D
Control	Wi-Fi and Touch Screen	
Power Supply	120VAC, 60Hz	120VAC, 60Hz
Energy Factor (liters/kwh)	2.0	1.86
Current Draw (Amps)	6.2	8.8
Air Flow (CFM)	180	220
Inlet Air Operating Temperature	50°F - 90°F / 10°C - 32°C	
Control Board Display Temperature	-4°F - 158°F operating / -22°F - 176°F storage
